Baby Beluga in the Shallow Gray Sea: Looking for newborn whales with drones in Cook Inlet, Alaska.

Learn about the endangered population of Cook Inlet beluga whales which regularly swim past local Anchorage landmarks such as the Port, Kincaid Park, the airport, and Bird Point in Turnagain Arm. We will talk about how belugas live, see cool photos of them taken from a drone that we use to recognize newborn baby whales, and listen to them buzz and chomp on a fish!

About NOAA Live! Alaska:

NOAA Live! Alaska is a weekly series of interactive webinars, aimed at Alaska students in grades 2-8 (but of interest to all ages!). We will feature NOAA scientists, educators and partners to explore NOAA's work in Alaska. Learn about current research. Connect to what's going on in your communities. Join us to ask questions to our presenters and learn more about weather, oceanography, marine life, fisheries and more in Alaska!

NOAA Live! Alaska is coordinated by NOAA Alaska Fisheries Science Center, NOAA's Alaska Regional Collaboration Network, and the National Weather Service. Contact Lisa.Hiruki-Raring@noaa.gov with any questions.
